General Rule

1. How to sort webcomic content list when entering the content detail screen.

★When entering the content detail screen and stopping episode playback and returning to the content detail screen, the Episode List should be sorted appropriately.

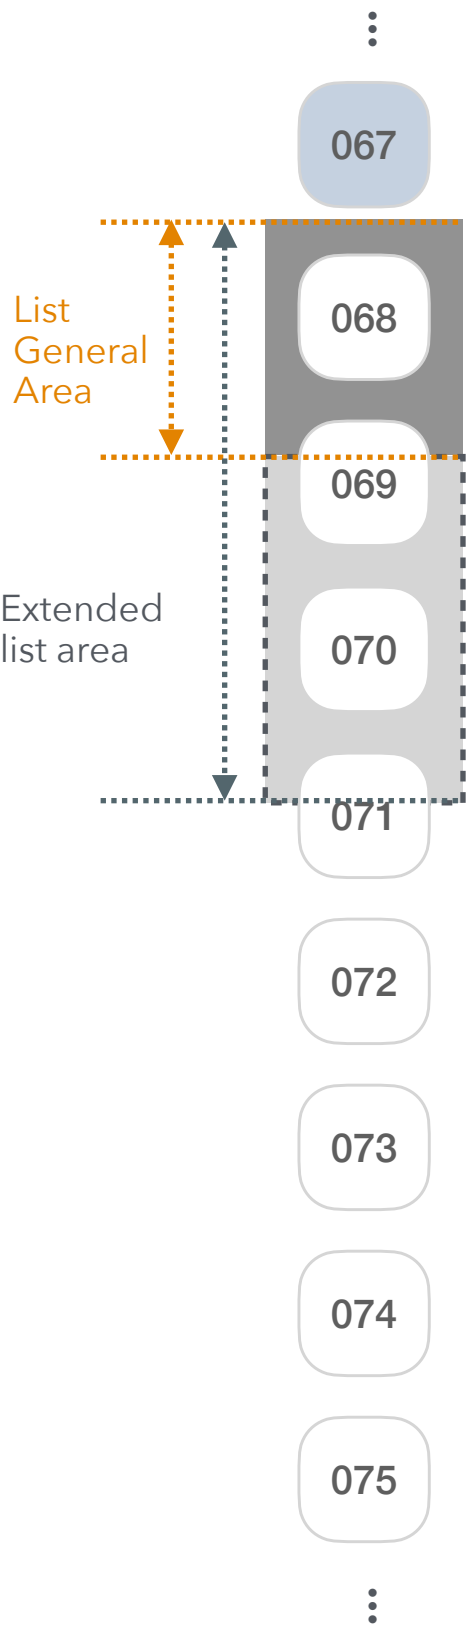

Case #1 If the user has never viewed webcomic episode content.

Case #2 If there is webcomic episode content the user last viewed.
And that's if the user has not viewed all of the last episode the user watched.
(ex. Last viewed webcomic episode number is the 067)

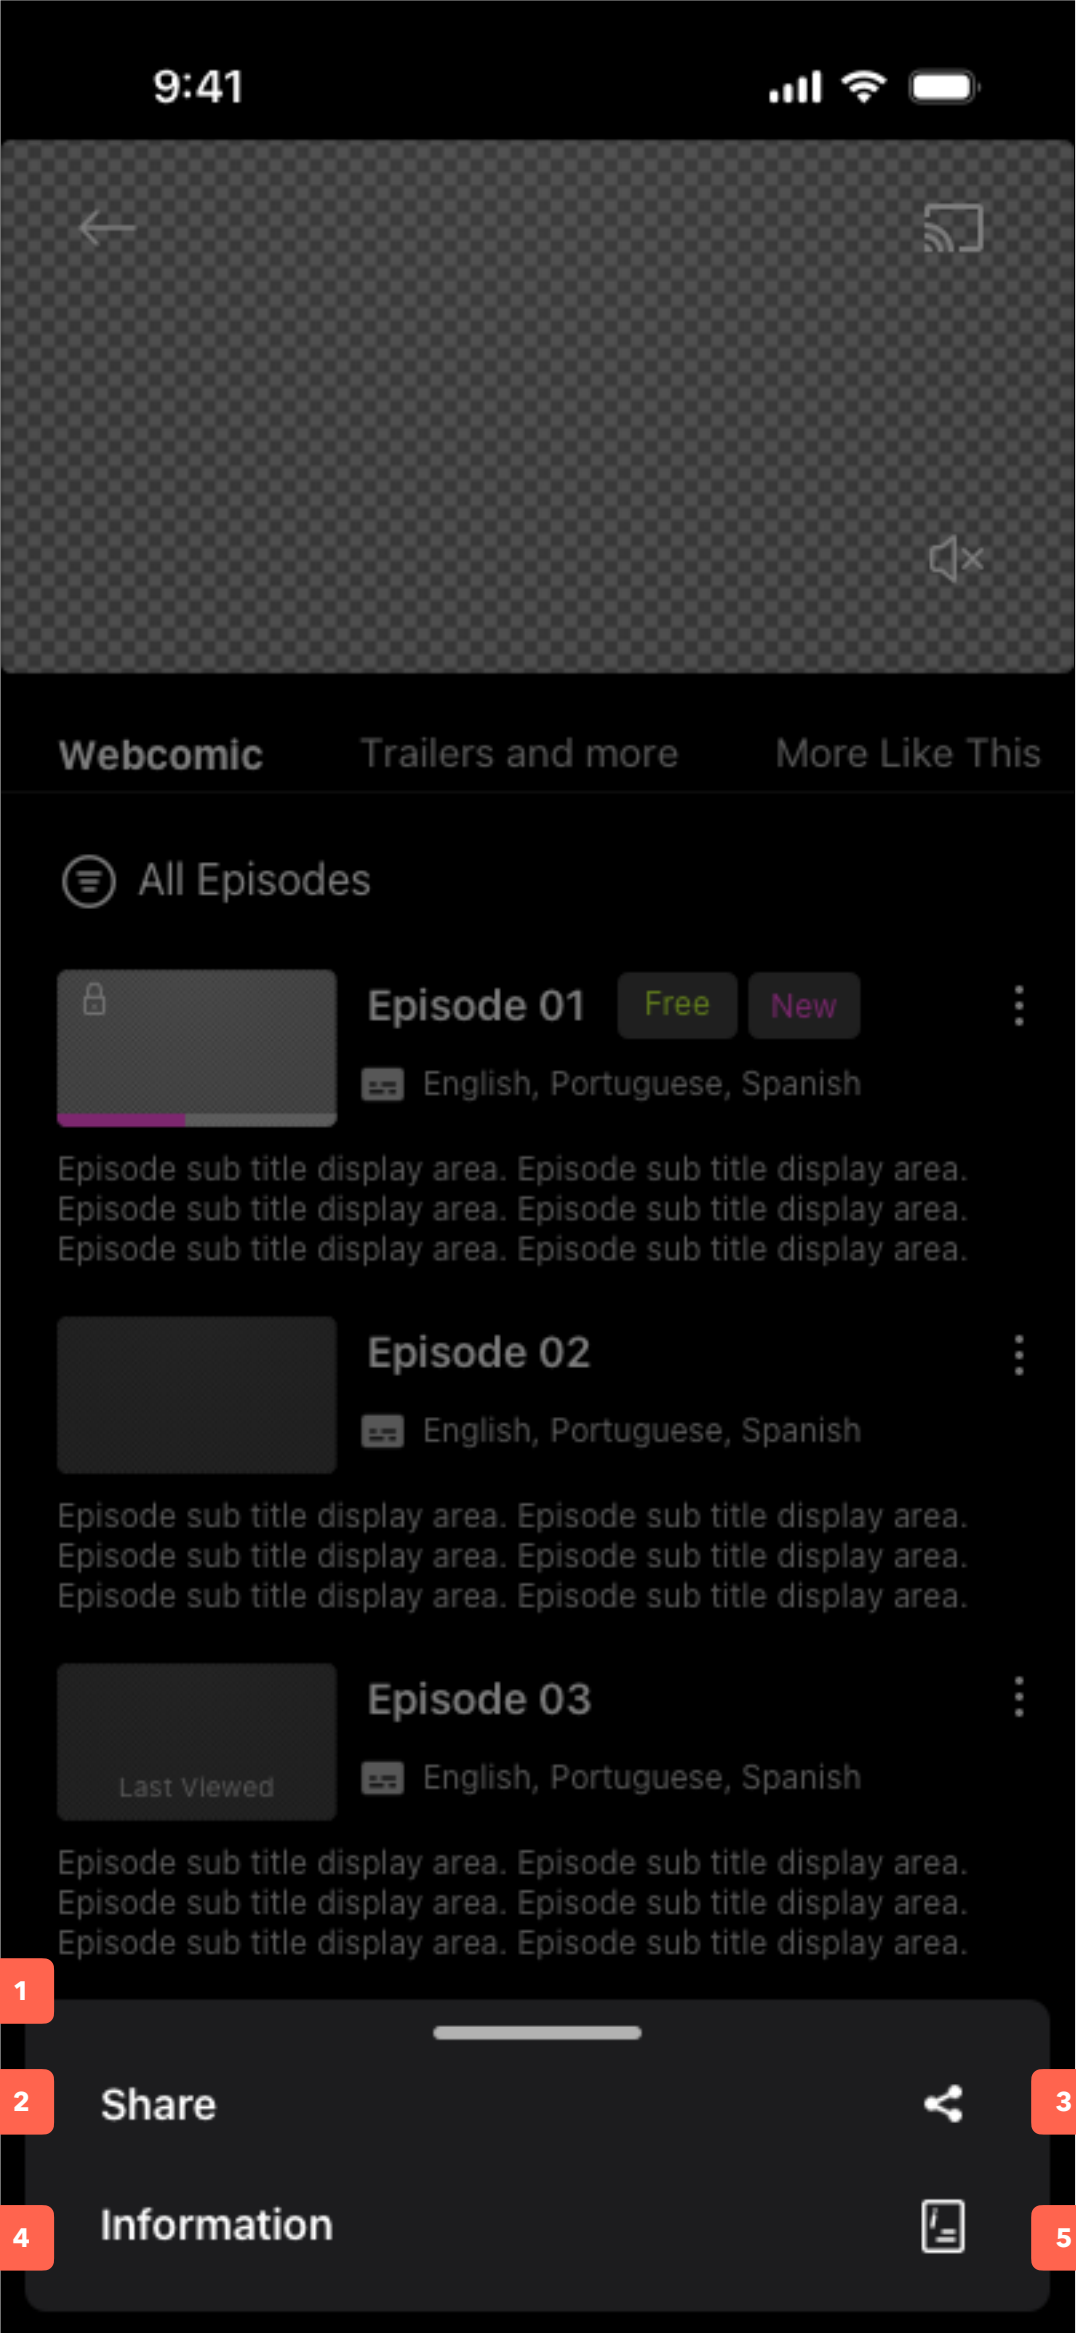

Case #3 If there is webcomic episode content the user last viewed.
And the user has viewed all the Last View Episodes.
(ex. Last viewed webcomic episode number is the 067)
